**HEATING
TURNS INTO
A BRAND**

ALL-IN-ONE-INFRAROT- HEATING PANELS

We combine

- “Made in Austria” quality
- top design
- cutting-edge technologies and production processes
- affordable purchase
- easy handling
- low energy consumption and
- environmental awareness

into a unique All-In-One Infrared Heating Panel
of the Design4Heat brand

FOR INDIVIDUAL ROOM DESIGN & EFFICIENT HEATING

01

UNIQUE

Along with state-of-the-art technology, the complete package is absolutely unique: The scope of delivery includes everything you need – except a drilling machine for the installation and a socket for the connection.

At the back, the panel merely heats up to body temperature. Owing to a special, slightly curved design, the heat radiation is channeled in all directions throughout the room.

02

STYLISH

Thanks to the individual design options, your heating system turns into your personal design statement on the wall.

AFFORDABLE

The warm-up period lasts only a few minutes; after that, power consumption is 20% reduced, with unchanged heat radiation. This way, you save one-fifth of the energy required during ongoing operation.

03

04

CAPABLE

Solar heat feels great: The secret is infrared waves, which human beings perceive as the most agreeable heat source of all.

The All-In-One Heating Panels from D4H work exactly according to this principle. They are ultra light-weight, thinner than a flat screen TV, stylish, efficient, economical and environmentally friendly, cost-effective and easy to install on any type of wall.

COOL SELECTION - WARMLY RECOMMENDED!

CLASSIC

STANDARD

DESIGNS

The All-In-One Infrared
Panels of the D4H brand are available in
different sizes and surface designs –
but they always come as a high-quality
complete package, including acces -
series and installation material.
